Our Contact

PT. Trilogy Digital Access or **TRIDI**ACCESS is a company built to follow the rapid growth of the global economy, where we engaged in extensive businesses.

Our initial focus is on digital information technology, which has now become an integral part of our lives. It has become a lifestyle which controls all aspect in our life. In addition, we also expand ourselves to the telecommunications business, digital media, including broadcasting which is currently growing rapidly, and has very good prospects in the future.

To synergize the existing business, TRIDIACCESS also do trading business with SMEs in Indonesia, with the objective to direct them to do business with the Export and Import oriented. In trade, TRIDI also serves as part of importers and exporters. In all the business we do, we will not stop, and will always strive to be better.

However, through all of this, we have chosen to focus and compete in three sectors: **telecommunication trade services, information technology solution** and **broadcast media & event**. In the future, we will continue to develop with the cooperation network that we have built and we will certainly provide added value to the improvement of the telecommunications and media industry in the world.

Ajigama
CEO

01 Brilliance

Delivering top-tier service quality and ensuring **customer satisfaction**.

02 Synergy

Working together **to create something greater** than either of you could do alone.

03 Transformation

Always driving digital evolution and adapting to new industry **trends**.

VISION & MISSION

Vision

to become a leading information technology company that prioritizes customer satisfaction and provides the best experience for them when the world is in your hand.

Mission

providing all high-quality information technology support that suits consumer needs, through the best solutions.

MILESTONE

Established under the name of Trilogy Digital Inspira, **Trilogy Digital Access** has become a company that focuses on supporting internet network infrastructure, supporting digital communications and events.

- 2013** The company was founded based on the wishes of 3 initiators who are the owners of Trilogy Digital Inspira,
- 2017** **assisting in the implementation of IMO brand mobile phone import activities, initiating Huawei's to entry the Indonesian mobile phone market.**
- 2023** managed to survive in the midst of a declining global economy and continues to grow into a stronger and more aggressive company with segments in telecommunications trading services, information technology solutions and broadcast media & events.
- 2025** collaborate with factories that produce the best information technology support equipment in the world, with competitive prices but still able to actively compete to continue and contribute significantly to the expansion of the internet connection network in Indonesia. Trilogy Digital Access has also become a strategic partner for various internet service providers that share the same goal... making the world in your hand.

We have the capabilities and specialization to support three business groups to the maximum

telecommunication trade services

Telecommunications services are at the heart of the digital economy, enabling e-commerce of goods and services. This sector contributes over US\$1.6 trillion in revenue, 65 percent of which comes from mobile services. Telecommunications has also supported the adoption of various other services and their capacity to meet the dramatic increase in demand for online activities due to COVID-19.

information technology solution

Information technology (IT) solutions encompass a broad range of services, software, and hardware designed to help businesses manage their technical operations and optimize information management. These solutions can include everything from cloud-based data storage and cybersecurity to customer relationship management (CRM) systems and automation tools. Essentially, IT solutions aim to streamline processes, improve efficiency, and enhance decision-making within an organization.

broadcast media & event

Broadcasting and events are closely related. Broadcasting is the process of disseminating information and entertainment through mass media such as television, radio, or digital platforms. An event, on the other hand, is an activity or performance organized for a specific purpose, such as entertainment, information, or marketing. Many events utilize broadcast media to reach a wider audience.
